PREREQUISITES: NURS0208, NURS0210 and NURS0212

REQUIRED TEXT AND MATERIALS: Please check with the KCKCC bookstore, http://www.kckccbookstore.com/, for the required texts.

COURSE DESCRIPTION:
This is the final medical surgical nursing course. In this course accumulated nursing knowledge and skills will be demonstrated to provide a safe, effective, and caring environment for adult clients whose psychosocial and physiologic integrity are compromised. The student will provide nursing care that supports the homeostatic regulation of clients in the areas of fluid volume, tissue perfusion, acute respiratory and neurologic management in a culturally diverse population.

During this course the use of the nursing process, critical thinking skills and documentation, along with communication skills in the areas of teaching/learning, patient care management, and delegation will be focused upon in the interactions with the multidisciplinary care team.

METHODS OF INSTRUCTION:
A variety of instructional methods may be used depending on content area. These include but are not limited to: lecture, multimedia, cooperative/collaborative learning, labs and demonstrations, projects and presentations, speeches, debates, panels, conferencing, performances, and learning experiences outside the classroom. Simulation experiences are included as part of the clinical and/or didactic experience. Methodology will be selected to best meet student needs.

COURSE OUTLINE:

I. Nursing Care of Clients with Cardiac Disorders
   A. Acute Coronary Syndrome
   B. Arrhythmias and Pacemakers
   C. Valves and Inflammatory
   D. Heart Failure
II. Nursing Care of Clients with Liver, Burns, Shock and Respiratory Failure
    A. Liver Failure and Hepatitis
    B. Shock
    C. Burns
    D. Respiratory Failure
III. Nursing Care of Clients with Neurological or Auto-Immune Dysfunction
    A. HIV SLE
    B. Cancer
    C. Head injury and CVA
    D. Spinal Cord Injury
    E. Chronic Neurological

EXPECTED LEARNER OUTCOMES:
A. The student will be able to integrate caring behaviors in practicing the art and science of nursing within a diverse population.
B. The student will be able to implement professional standards and scope of practice within legal, ethical and regulatory frameworks.
C. The student will be able to collaborate with clients and members of the interdisciplinary health care team to optimize client outcomes.
D. The student will be able to adapt through the use of the nursing process the ability to think critically and make safe and effective clinical judgments.
E. The student will be able to manage care and provide leadership to meet client needs using available resources and current technology.
F. The student will be able to generate teaching and learning processes to promote and maintain health and to reduce risks for a variety of clients.
G. The student will demonstrate effective communication methods to manage client needs and interact with other health care team members.
COURSE COMPETENCIES:

The student will integrate caring behaviors in practicing the art and science of nursing within a diverse population.

1. The student will be able to adapt nursing interventions to meet individual client’s holistic needs taking into consideration cultural values, beliefs and lifestyle.
2. The student will be able to demonstrate a caring attitude without imposing personal values during clinical experience.
